Comments on Parts F and G of [REDACTED] Manual on "Intelligence  
Facilities and Techniques"

REFERENCES: Part F -- The Analytical Process -- Techniques and Tools, 5 March 1959  
Part G -- Mechanics of Report Preparation, 1 March 1959

1. The two manuals have been thoroughly reviewed by Geography Division personnel. They have no particular comment to make, except to say that they appear to be solid and complete pieces of work.

2. It is a little difficult to relate the elementary nature of the manuals to the needs of ORR. They cover those fundamentals of research which any analyst should have learned, prior to employment, as an integral part of his training.
